Under the guidance of

Dr. V. Sireesha Professor,
Department of CSE

Hyderabad-500090, Telangana, India.

ABSTRACT

Every year, thousands of research papers are published, making it difficult for students and researchers to find relevant papers quickly. Research Connect is a smart research paper search system that allows users to search papers by title, author, keywords, and research domain. It also suggests similar papers based on content similarity and supports typo-tolerant searching. The project uses advanced algorithms such as KMP for fast keyword searching, Edit Distance for fuzzy search, Suffix Array/LCP for document similarity, and Graph algorithms to show citation relationships between papers. The system demonstrates how advanced data structures and algorithms can improve the speed and accuracy of research paper discovery.
